All stock is first class, carefully fumigated, and state inspected.

TREATING BULBS BEFORE PLANTING.

One of the most effective and easily used dips that I have tried is a cresol solution put up by the Standard Oil Co., called "Super-Germite". The soaking time is cut to four hours, instead of the 12 to 16 necessary with corrosive sublimate. Also it has a stimulating effect on root growth, rather than a retarding effect as does corrosive sublimate. If you are unable to obtain "Super-Germite" locally, we can supply in quart, gallon, or five gallon cans. We can also supply Calogreen or corrosive sublimate. Prices on request.
